

Intellia Workforce Training System

The solution for scalable, structured, and measurable operator development

The Intellia Workforce Training System unifies simulation, curriculum, and training management into one integrated solution. It enables organizations to standardize training, maintain

consistency across programs, and develop operators to a higher, measurable standard. The result is safer training environments, more consistent outcomes, and faster workforce readiness.

Marc Patenaude,
Senior Operations Manager
Fleming College

We use this data and feedback to advance students through the program according to consistent standards. We know the results are accurate, and we can use them as a platform to teach going forward.

Meet the Intellia Workforce Training System

Training Curriculum

Consistent skill building across every stage of operator development

Simulator-Based Training

- Experience proprietary high-fidelity physics-based equipment simulation
- Immerse in risk-free simulation exercises that mimic actual jobsite scenarios
- Provide real-time feedback on technique and performance
- Reduce risks of negative training with authentic machine behaviors

Web-Based Curriculum

- Access self-paced online lessons and resources anytime, anywhere
- Watch instructional videos that support preparation and reinforcement
- Train for walkaround inspections online
- Prepare in advance to make better use of simulator time

Structured Learning Paths

- Guide trainees from foundational knowledge to advanced competencies
- Adjust scoring to suit organization's training requirements
- Enable students to progress while instructors give targeted support
- Align curriculum with industry standards and certifications

Training Management Tools

A connected system for every role and responsibility

Intellia Administrator

- Manage users, roles, and curriculum across sites
- Track trainee progress and program performance
- Monitor system use and training capacity
- Generate standardized reports for compliance and scalability

Intellia Instructor

- Monitor multiple simulators in real time
- Trigger random live weather, plus machine faults and scenarios
- Evaluate performance using objective metrics
- Use AI assistance for guidance and faster workflows

Intellia Trainee

- Provide structured web-based learning management
- Access detail group and trainee analytics on skills and progress
- Manage online and simulator access for optimal ROI
- Receive immediate feedback and performance reports

Simulators and Auxiliaries

A wide range of solutions for every training need

Hardware options to enhance training

- Choose from a full range of simulators, from portable to fully immersive
- Train for all equipment on one simulator
- Leverage multiple configurations to best suit training experience
- Hot swap industry-grade controls
- Include additional specialized stations for machine control and crew training

From the portable
Edge Plus to...

the fully immersive
Advantage.
