

Form 3

Learning Labs, Inc. offers a series of project-based learning (PBL) resources to accompany leading prototyping and manufacturing hardware. Users of all skill levels can learn by doing, using orientation materials and step-by-step projects.

Required Materials:

To complete all of the included projects you will need:

- Formlabs Form 3 3D printer
- Formlabs standard resin (installed)
- Isopropyl alcohol (IPA)
- Jig
- Removal tool
- Flush cutters (clippers)
- Finish Kit or Form Wash
- Hobby blade

Additional materials may be required for some projects. These are provided in bundled sets. Each set allows you to complete:

- Nut and Bolt Set
- Model Hand
