

Learn the fundamental concepts of hydraulic and pneumatic systems for maintenance individuals in the manufacturing environment.

> HANDS ON

The Mobile Modular Training Systems™ Pneumatics
Trainer and curriculum provides a practical approach
for new training or expanding existing skills with learners
gaining valuable hands-on experience using safe
pneumatics principles and methods.

EXCLUSIVE DESIGN

Our exclusive design allows for **complete mobility** (train where you want), **connectivity** (mobile units connect to provide additional expanded training), and **storage** (storage racks hold multiple units for convenient transport and storage).

INDUSTRY STANDARD Our practical approach utilizes **industry-standard** components, designed to simulate industrial systems that are modular and offer connectivity with infinite opportunities for continued learning to close the skills gap.

**Expand Your Training** 

HMI Operator Trainer VFD Trainer

Servo Motion Trainer

## Mobile Modular Training Systems™ Pneumatics Trainer

Our practical approach to training utilizes industry-standard components, designed to simulate industrial systems that are modular and offer connectivity with infinite opportunities for continued learning to close the skills gap. Students trained on our Pneumatics Trainer will learn:

## Target Competencies for the Pneumatics Trainer

- Implement basic Pneumatic Circuits
- Apply Pascal's Law & Boyle's Law to pneumatic systems
- Implement air flow control and measurement to control speed
- Identify specific pneumatic component symbols and use of components

## **Pneumatics Trainer Connectivity**

- PLC Trainer (optional)
- HMI Trainer (optional)

Proven, successful curriculum is included for every trainer for classroom, one on one, online or self-paced training programs.

\* Pneumatics Trainer requires a separate compressed air source
