

UVC LIGHT Sterilization

UVC technology has been in use by hospitals for its clinically validated effectiveness in killing germs since the 1930s.

Any living cell that is exposed to UVC light will be affected—including viruses, bacteria, yeast, mold, algae, amoebas, and allergens.

Benefits of UVC Sterilization

Highly effective in killing every known microorganism (including coronavirus strains) and shown to reduce viral illness rates.

Boost morale by creating a protected environment—not just for workers—but anyone who enters your facility.

Save money with an alternate option to COVID-19 packages with recurring costs and non-quantifiable results.

Safe for the environment and humans with light naturally emitted from the sun, does not disperse mysterious chemicals.

Get all advantages UVC has to offer without adding more work, just activate the troffer with the push of a button.

UVC Disinfection

VS

Chemical Cleaners

Hypoallergenic and safe	✓	RESIDUE	✗	Leaves toxic irritants behind
Effortless once installed	✓	EFFORT	✗	Requires manual labor
Run automatically with remote	✓	FREQUENCY	✗	Dependent on a worker
Effective every single time	✓	ERRORS	✗	Prone to cross-contamination
No recurring purchases	✓	COST	✗	Buy materials frequently
8,000+ cycles per bulb	✓	UPKEEP	✗	Constant maintenance
Works against all microbes	✓	EFFECT	✗	Must include correct biocides
Environmentally friendly	✓	NATURE	✗	Chemical storage and waste
