

# Markforged Onyx One

Learning Labs, Inc. offers a series of project-based learning (PBL) resources to accompany leading prototyping and manufacturing hardware. Users of all skill levels can learn by doing, using orientation materials and step-by-step projects.

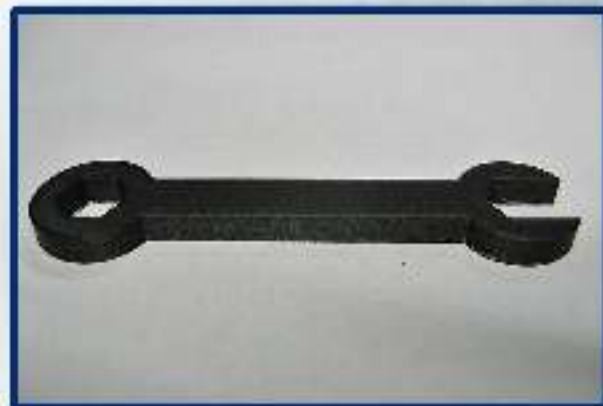

## Required Materials:

To complete all of the included projects you will need:

- Markforged Onyx One 3D Printer
- Onyx (chopped carbon fiber) filament spool
- Dry box
- Plastic adjustment shim
- Bed scraper
- Glue stick
- X-Acto knife
- Pliers
- Wire cutters
- Tweezers
- Scale with grams measurement

Additional materials may be required for some projects. These are provided in bundled sets. Each set allows you to complete:

- Gear Set
- Nut and Bolt Set
- Wrench
- Model Hand
