Be READY

Nasco Healthcare Auscultation Trainer 2.0

Be READY for effective simulation of auscultation techniques with incredible realism.

Auscultation Trainer 2.0

Nasco Healthcare's Auscultation Trainer 2.0 powered by SmartScope 2.0 is the latest evolution of our Auscultation Trainer, offering highly realistic simulation of heart, lung, and bowel sounds to improve diagnostic accuracy.

Using the SmartScope 2.0, lung sounds can be detected at eleven anterior, ten posterior, and two midaxillary locations. Learners can practice auscultation at five anterior heart sites and five bowel sites.

A diagnosis of the condition chosen by the instructor can be determined by comparing the variations in sounds at different sites, mimicking the experience with a real patient.

Key Features

- Customizable illuminated sites can be shut on/off to adjust training di culty
- Realistic heart, lung, and bowel sounds
- Wireless connectivity
- Palpable landmarks
- Carry case
- SmartScope 2.0

- 5-year warranty
- **NEW** Custom sounds via user upload
- **NEW** Rechargeable USB-C

Illuminated auscultation sites.

Elevate skills needed to correctly identify cardiac, respiratory and bowel sounds, for effective diagnostic accuracy.
