

CONTROL DEVICES TRAINER

Learn the concepts of various industrial control devices as well as when and where to use them.

CURRICULUM INCLUDED

HANDS ON

The **Mobile Modular Training Systems™ Control Devices Trainer** and curriculum provides a practical approach for new training or expanding existing skills with learners gaining valuable **hands-on** experience with various controls devices from temp sensors to color optic sensors.

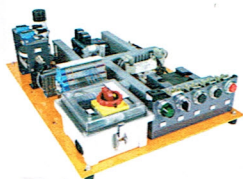

EXCLUSIVE DESIGN

Our exclusive design allows for **complete mobility** (train where you want), **connectivity** (mobile units connect to provide additional expanded training), and **storage** (storage racks hold multiple units for convenient transport and storage).

INDUSTRY STANDARD

Our practical approach utilizes **industry-standard** components, designed to simulate industrial systems that are modular and offer connectivity with infinite opportunities for continued learning to close the skills gap.

Mobile Modular Training Systems™ Control Devices Trainer

Our practical approach to training utilizes industry-standard components, designed to simulate industrial systems that are modular and offer connectivity with infinite opportunities for continued learning to close the skills gap. Students trained on our Control Devices Trainer will learn:

Target Competencies for the Control Devices Trainer

- Apply digital input devices in PLC control circuits
- Apply digital output devices in PLC control circuits
- Analyze Process Control Devices
- Create Process Control Loops
- Identify Process Control Elements

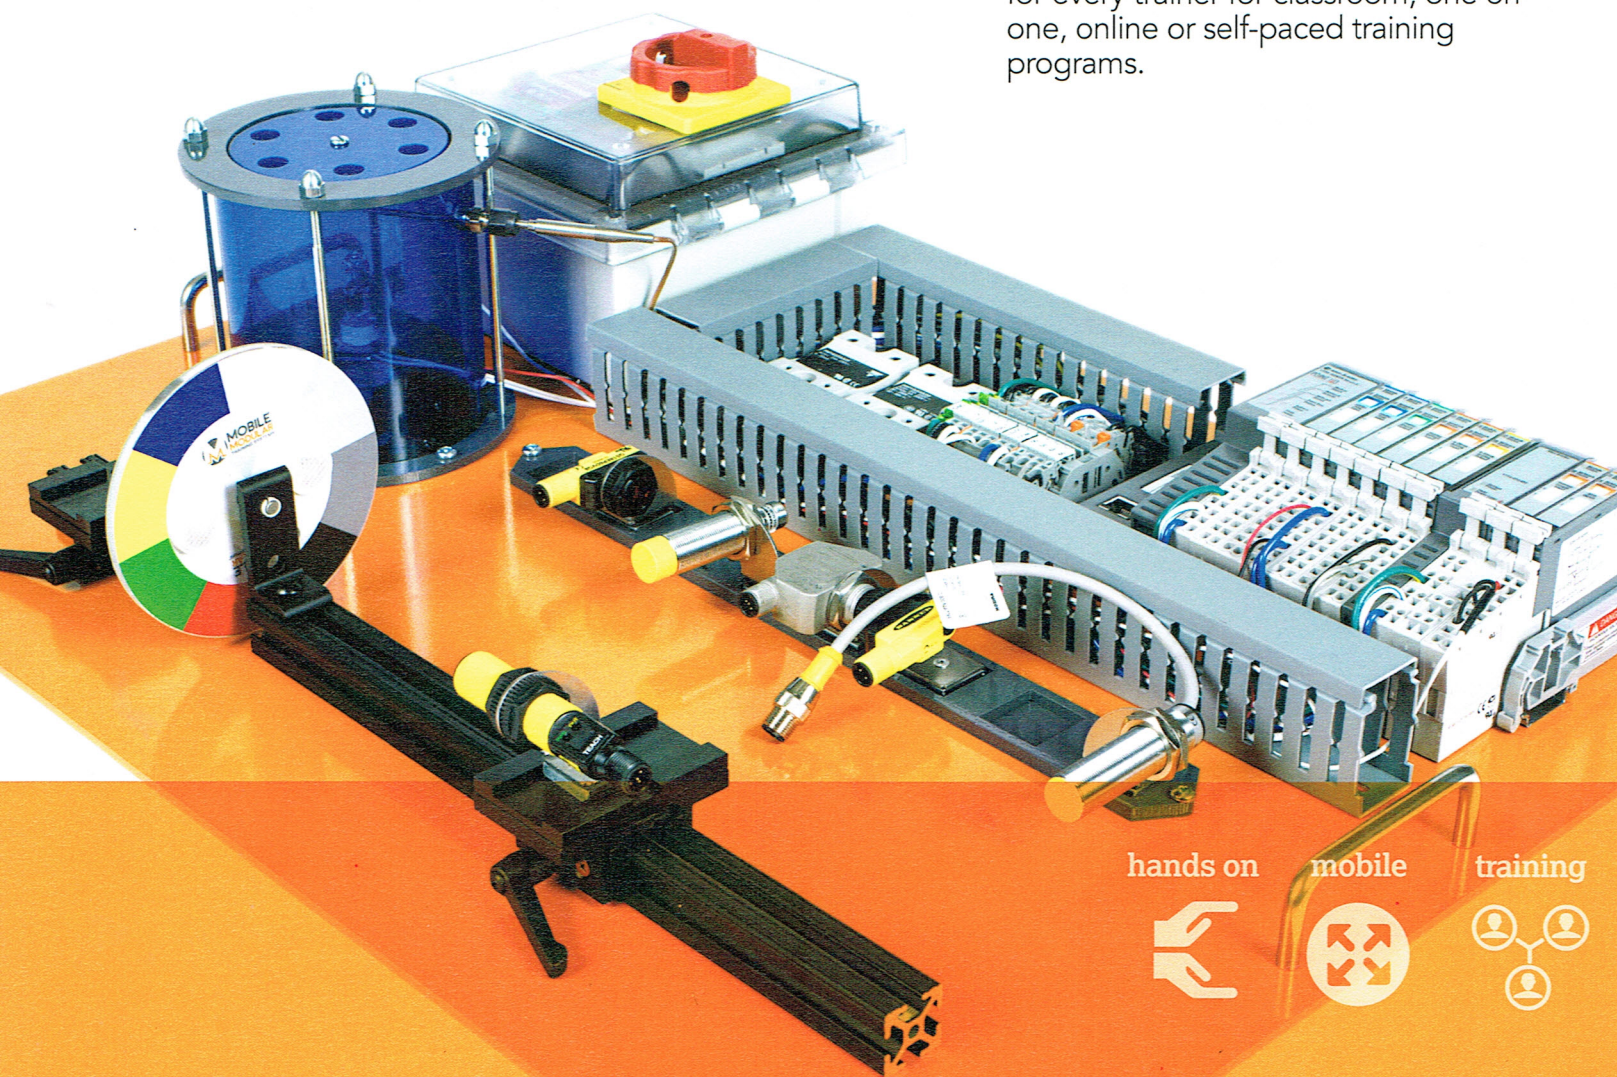

Control Devices Connectivity

- PLC Trainer (required)
- HMI Trainer (required)

CURRICULUM INCLUDED

Proven, successful curriculum is included for every trainer for classroom, one on one, online or self-paced training programs.
