

HMI (HUMAN MACHINE INTERFACE) OPERATOR STATION

Learn to safely connect and control various trainers by using the HMI unit.

HANDS ON

The **Mobile Modular Training Systems™ HMI Operator Station Trainer** provides a practical approach for new training or expanding existing skills with learners gaining valuable **hands-on** experience in conjunction with **Mobile Modular Training Systems™ PLC, VFD, and Servo Trainers**.

EXCLUSIVE DESIGN

Our exclusive design allows for **complete mobility** (train where you want), **connectivity** (mobile units connect to provide additional expanded training), and **storage** (storage racks hold multiple units for convenient transport and storage).

INDUSTRY STANDARD

Our practical approach utilizes **industry-standard** components, designed to simulate industrial systems that are modular and offer connectivity with infinite opportunities for continued learning to close the skills gap.
