What is KG Test & Train?

❑ KG Test & Train turns any car into a training center! No need to buy training rigs, break test vehicles or spend on expensive demonstration materials – just connect KG Test & Train to a normal car and you are ready to train.

❑ Connect KG Test & Train to a common car and use our app to set up fault simulations. All our simulations use the vehicle's own systems making them extremely realistic and very close to a real problem. Demonstrate a complex ABS problem or a common injection pump fault – effortlessly.

❑ KG Test & Train enables instructors to do more with less effort in in-person trainings. We take the hassle out of practical training and let instructors focus on what really matters: teaching. Train multiple technicians for several fault types on different car models at the same time.

❑ **KG Test & Train works on standard cars, electric & hybrid cars, light duty & heavy duty trucks, farm equipment, construction equipment, and more…**

What Problems does KG Test & Train solve?

TIME - finding the time to set & unset faults

CONSISTENCY - difficulty setting the faults the same way for all your students

ACCESSIBILITY - challenges accessing/reaching certain components in the car…especially EVs

LOANER VEHICLE - finding new vehicles when dealerships/shops ask for the loaner vehicles back

Benefits

MORE RESULTS WITH LESS EFFORT

Run simulations on several cars in parallel

Switch between simulations in one click

DEVELOP NEW TRAINING SCENARIOS ON THE FLY

Test different configurations to find the right one for your training

Share training scenarios with fellow educators in your department

AUTOMATE YOUR WORKFLOW

Store simulations in your playlist/library and replay for future courses

KG TEST&TRAIN
1 solution - 4 Products

KG App
Controls the KG Box

KG Box
Executes simulations on vehicle

KG TERMINALS
Enable measurements with multimetre/oscilloscope

KG AUTO CABLES
Enable connection from vehicle to KG Box

KG App

REMOTE CONTROL
Configure, activate and deactivate fault simulations from the KG Box.

SIMULATION LIBRARY
Store, replay and share simulations.

COMPATIBLE WITH ANY CONNECTED DEVICE
Compatible with all internet browsers…use on any computer, smartphone, tablet or smart TV.

KG Box

COMPATIBLE WITH ANY VEHICLE
Works with cars (standard, EV), trucks (light, heavy), motorcycles, farm & construction equipment and more

COMPATIBLE WITH ANY ECU
No OBD II connection required

INTERNET CONNECTION
Uses ethernet cable, WiFi or mobile data. Also able to use without the internet

Simulation Types
Open Circuit, Short circuit to mass, Voltage variation 0v - 5v, PWM 0% - 100%

PRICING
1 complete bundle contains the following components:
1. KG Box
2. KG Terminal
3. KG Subscription   (3/5/10-year subscription plans available)
4. KG Connector Cables

Connector Cables are vehicle-specific. Prices vary slightly across manufacturers.
Work with your salesperson to determine exact pricing based on your vehicle you'll want to connect to the KG Test & Train product.
